Terazol

Terazol is a vaginal cream used to treat vaginal yeast infections.

Terazol should not be used if:

- You are pregnant or breastfeeding

Side effects of Terazol are:

- Menstrual cramps

Directions for the use of this medication:

- Insert the filled applicator in the vagina at bedtime for 3 consecutive nights.

Special Instructions:

- Do not use with contraceptive diaphragms or condoms
- Discontinue if fever, chills, irritation or flu-like symptoms occur.
- Wash applicator in warm soapy water and let dry between uses.
