

PUBLIC BEACH MONITORING INFORMATION

This beach is **NOT MONITORED** for E.coli bacteria levels.

Be aware that E.coli levels exceeding State water quality standards may pose a potential health risk. Gastrointestinal and dermatological illnesses have been associated with recreational water exposure. E.coli bacteria levels may be higher after a storm. Use caution 48 hours after a rain event.

Additional information can be found by contacting the municipality or beach owner at: _____

Or by contacting your Local Health Department At:
